

Alexei Kuznetsov

Engineering Project Manager / Chief Project Engineer

Kazan, Russia | +7 912 913 33 47 | alexeiugntu@gmail.com | alexei.systems | Open to relocation and international project opportunities

PROFESSIONAL PROFILE

Engineering Project Manager with 18+ years of experience across oil & gas infrastructure, pipeline systems, oil pumping stations, mechanical systems, operations, construction supervision and project delivery. Combines design coordination, field operations, maintenance leadership and author's supervision experience with a practical systems-thinking approach.

CORE STRENGTHS

- Oil & gas pipeline infrastructure and transportation facilities
- Oil pumping stations, mechanical systems and process equipment
- Engineering project management and design coordination
- Construction supervision, author's supervision and contractor interface
- Operations, maintenance, commissioning support and field troubleshooting
- Technical documentation, quality control, risk awareness and stakeholder communication

PROFESSIONAL EXPERIENCE

Chief Project Engineer | NeftePromProject LLC

Kazan | May 2025 - Present

- Provide technical leadership for design and survey work on industrial infrastructure projects.
- Prepare and coordinate technical assignments for subcontractors and specialist design teams.
- Control technical design solutions, project documentation flow and interdisciplinary task exchange.
- Resolve technical issues during documentation development and support project defense with expert authorities.
- Organize and control author's supervision during construction of designed facilities.

Head of Author's Supervision Group | Giprotuboprovod JSC / Transneft system

Kazan | Feb 2017 - Jun 2022

- Led author's supervision activities for oil & gas infrastructure and construction projects.
- Checked construction works for compliance with design solutions and technical documentation.
- Coordinated technical solutions with customers, contractors and construction-site stakeholders.
- Resolved field issues during construction and supported technically sound project delivery.
- Contributed to 100+ reconstruction and technical re-equipment projects for mechanical equipment and engineering systems.

Chief Mechanical Engineer | MELIUS LLC

Simferopol | Jan 2016 - Jan 2017

- Organized design work for fire-protection and fire-extinguishing systems.
- Prepared technical assignments and coordinated customers across design and installation stages.
- Controlled construction and installation works on sites and supported cost optimization initiatives.

Chief Mechanical Engineer | Transneft - Siberia / Urengoy Pipeline Directorate

Yamalo-Nenets Autonomous Okrug | May 2013 - Jan 2016

- Participated in the Zapolyarye - Purpe trunk pipeline project and related oil transportation infrastructure.
- Planned, organized and controlled maintenance and repair of mechanical and process equipment.
- Managed equipment records, spare parts allocation, technical condition assessment and interdepartmental coordination.
- Supported acceptance tests and readiness of equipment for safe operation.

EARLIER TRANSNEFT OPERATIONS EXPERIENCE

Oil Pumping Station / Line Production Dispatch Station Manager | Uralsibnefteprovod, Medvedskoye LPDS

Oct 2012 - Apr 2013

- Managed station operations, safe oil transportation, equipment availability, quality control, commissioning after repairs and contractor work control.

Deputy Station Manager | Uralsibnefteprovod, Yurgamysh LPDS

Sep 2011 - Oct 2012

- Supported station leadership, operational reliability, technical documentation, reporting, maintenance control and safe process execution.

Mechanical Engineer, Mechanical & Process Equipment Maintenance Area | Uralsibnefteprovod, Yazykovo LPDS

May 2010 - Sep 2011

- Ensured safe operation, maintenance planning, repair supervision, spare-parts control and readiness of mechanical-process equipment.

Maintenance Area Manager / Foreman / Technician | Vostoknefteprovod, NPS-17

Aug 2008 - Feb 2010

- Gained hands-on field experience in mechanical equipment maintenance, repair execution, technical accounting and production-team coordination.

SELECTED PROJECT EXPOSURE

- **ESPO / Eastern Siberia-Pacific Ocean Oil Pipeline Projects:** Oil pipeline infrastructure, design coordination and technical supervision support.
- **Zapolyarye - Purple Pipeline Project:** Major oil transportation infrastructure, mechanical equipment and operations interface experience.
- **Transneft oil pumping station equipment replacement:** Modernization of pumps, oil systems, filters, transformers, process piping and related station infrastructure.
- **Industrial facilities and test infrastructure:** Experience connected with Tatburne Production Base, Kazankompressormash Test Bench and gas infrastructure integration projects.

CREATIVE & PRODUCT EXPERIENCE

- **Fiollo Home - Recording Studio Launch:** Project management and early product coordination for a recording studio and music services platform in Kazan, including website development, service structure and launch-stage support.
- **Fiollo Audio Analyzer:** Music-tech concept and website implementation for track diagnostics, loudness, True Peak, spectrum and metadata analysis.
- **AI Track Generation Platform:** Early-stage service concept for paid AI-assisted music generation through a web interface.

EDUCATION

Ufa State Petroleum Technological University | 2008

Design, Construction and Operation of Oil & Gas Pipelines and Storage Facilities

TOOLS, LANGUAGES & OTHER

- Tools: AutoCAD, MS Visio, technical documentation workflows, website development basics, SEO basics.
- Languages: Russian native; English B1.
- Driving license: Category B.
